

To Whom It May Concern:

This letter is in response to your inquiry about the shelf life of the MiniFIBERS, Inc. product SHORT STUFF® Polyethylene.

The SHORT STUFF® products from MiniFIBERS, Inc. will last indefinitely. The product does not deteriorate, and has no chemicals or additives that will change or alter the performance of the product over a long period of time.

The product should be protected from extreme elements and kept dry while in storage. Open bags should be protected from contamination.

Avoid storing the product for long periods of time with heavy weight stacked or placed on top of the bags. This will cause the product to compact and may cause problems with dispersion.

Storage with, or next to, chlorine or chlorinated products is not recommended.

The product should perform as expected, even after very long periods of storage, when all of the above precautions are taken.
